

# Cronos Security – Junior Vulnerability Engineer

## Junior Vulnerability Management Engineer

### Junior Vulnerability Management Engineer

Are you ready to take your vulnerability management expertise to the next level? As a **Junior Vulnerability Management Engineer**, you'll play a critical role in identifying, assessing, and mitigating security risks across dynamic IT environments. You'll work alongside cybersecurity professionals, engage with clients in various industries, and help shape security strategies that protect organizations from ever-evolving threats.

This is your chance to **lead impactful security initiatives and gain hands-on experience** with and real-world security challenges. If you're passionate about proactive risk management and want to make a difference, we want to hear from you!

### What You'll Do

**Hunt for vulnerabilities:** Conduct in-depth assessments using security tools to discover weaknesses before attackers do.

**Assess and prioritize risks:** Identify critical security gaps, propose actionable remediation strategies, and track progress to resolution.

**Deliver insights with impact:** Prepare detailed reports and confidently present findings to technical teams and senior stakeholders.

**Collaborate across teams:** Work closely with security architects, engineers, and IT teams to embed security best practices into daily operations.

**Drive remediation efforts:** Oversee and validate vulnerability fixes to ensure compliance and long-term risk reduction.

### What You Bring

- Experience with vulnerability management tools like Qualys, Tenable, or Rapid7
- An understanding of security frameworks (e.g., NIST, CIS, ISO 27001)
- Analytical skills to assess vulnerabilities and recommend effective remediation
- Excellent communication skills to engage both technical and non-technical stakeholders
- A proactive, problem-solving mindset with a passion for cybersecurity

### What You Bring to the Team

#### Your Background & Experience:

- **Education:** Bachelor's degree in Computer Science, Information Security, or a related field.
- **Interest:** You are interested in Cybersecurity and preferably in **vulnerability management, asset management, or risk management**.
- **Certifications:** Bonus points if you hold **CISSP, CEH, CompTIA Security+**, or other relevant security certs.

#### Your Technical Toolkit:

- **Vulnerability Management Expertise** – Potential hands-on experience with tools like Nessus, Qualys,

**Rapid7**, etc.

- **Data-Driven Mindset** – Strong skills in **Power BI, Qlik, Tableau**, or similar tools to transform raw security data into actionable insights.
- **Security Architecture Knowledge** – Basic understanding of **network security, system hardening, application security, and databases**.
- **Automation & Scripting** – Experience with **Python, Bash, PowerShell**, or similar scripting languages to streamline security processes.

#### **Your Soft Skills That Make an Impact:**

- **Analytical & Problem-Solving Mindset** – You love tackling security challenges head-on.
- **Strong Communicator** – Able to engage both technical and non-technical stakeholders.
- **Proactive Team Player** – You thrive in collaboration and are always eager to learn and improve.
- **Risk-Oriented Approach** – You see the big picture while paying attention to the details.

#### **Your Career Path & Growth Opportunities**

At **Cronos Security**, we believe in investing in our people. Your journey with us doesn't stop at **Junior Vulnerability Management Engineer**—it's just the beginning! We provide a structured career path with clear opportunities for advancement, including:

- **Medior Vulnerability Management Engineer** – Take on more complex security challenges, lead critical projects, and deepen your expertise in vulnerability management.
- **Security Leadership & Mentorship** – Step into leadership roles where you can **mentor junior engineers**, contribute to security strategies, and drive innovation.
- **Pathway to Cybersecurity Leadership** – Whether you aim for **Security Architect, Security Manager, or CISO**, we help you **shape your career towards your ambitions**.

#### **What We Offer – Competitive Benefits & Perks**

At **Cronos Security**, we don't just offer a job—we offer a **rewarding career** with a benefits package that sets you up for success:

- **Competitive Salary Package** – Earn what you deserve for your skills and expertise.
- **Company Car & Fuel Card/EV** – Because mobility matters.
- **Net Allowances & Meal Vouchers** – Extra perks to make your work-life smoother.
- **Comprehensive Insurance Package** – Including health, disability, and pension plans.
- **Work-Life Balance** – A **flexible hybrid work model** with a mix of remote and on-site work at clients.
- **Continuous Learning & Growth** – Access to **training programs, security conferences, and hands-on workshops** to keep your skills sharp.
- **A Collaborative & Supportive Team** – Work in a **no-nonsense environment** with colleagues who are always ready to help out.

Ready to **build your cybersecurity career with us**? Apply today and take the next step toward **making an impact in security**!
